The Incident Lab: How to Respond to and Learn From Production Failures

Courtney Nash

Sarah Butt

Alex Elman

Eric Dobbs

Hamed Silatani

AGENDA

1. Staged World Live Demo
2. Group Discussions: Demo Incident Analysis
3. BREAK
4. Common Analytical Traps
5. Revisit Demo Incident Analysis
6. Final Discussion

This looks bad

Cast of Characters

Reading Time

Use the QR code to pull up transcripts from a previous run of this incident.

We'll set a timer for 25 min for you to read through. Feel free to take notes!

When you're done reading, you'll discuss what you learned at your table.

➔ **Suggested Things to Consider**

- What went well?
- What was surprising?
- What was different from your own incident response experiences?

https://sarahbutt.github.io/srecon-26-emea

BREAK (30 min)

Common Analytical Traps

1. Hindsight Bias

2. Counterfactional Reasoning

3. Normative Language

4. Mechanistic Reasoning

5. Human Error as a Cause

Group Discussions Pt. 2

Reading Time Pt 2

Use the QR code to pull up transcripts from a previous run of this incident.

We'll set a timer for 25 min for you to read through. Feel free to take notes!

When you're done reading, you'll discuss what you learned at your table.

➔ **Suggested Things to Consider**

- Where do you see overload or saturation?
- What was surprising?
- What was different from your own incident response experiences?
