APP 4:14 PM
Someonetell me what is going on!

Alex Elman
4:16 PM
All, we're aware of an issue affecting primarily EMEA. We have confirmation of order confirmations and user activity dropping around 10:13am. We're currently starting an investigation

Bez
APP 4:17 PM
What is the current status of the website?
4:17
Is it completely down, or are parts of it still functioning (e.g., browsing, checkout, login)?
4:19
How much revenue is being lost per minute/hour?

Alex Elman
4:19 PM
The website is in complete outage and is displaying an unbranded 503 nginx error page.

Tinus
APP 4:19 PM
@Alex - what do you think is going on?

Alex Elman
4:19 PM
Do we have anyone from the social media or comms team here?
4:20
@Tinus
we currently are working on a diagnosis and will respond here again within 5 minutes once we know more

Bez
APP 4:21 PM
How many customers are affected (number of failed transactions, users unable to access)?
4:21
The website is unreachable?
4:21
What in the world is going on now?
4:21
Why is this happening?? We have a major sale today, and customers can't even access our site?
4:21
Apologies, i don't mean to take my frustration on you @Sarah Butt
4:21
Just this downtime is costing us money and reputation.
4:22
Any suggestions on what the root cause to be?

Tinus
APP 4:22 PM
@Sarah Butt keep us updated on progress. Bez, I'll move our meeting in 5 minutes to another date

Bez
APP 4:22 PM
Good, also If you need me to contact anyone please just ask.
4:22
@Sarah Butt Got some questions i need some information on
4:22
What % of customers are able to use the platform?
4:22
Do you think this incident will be wrapped up in 20 minutes? Just becuase i need to decide if i should reschudele a meeting with a client.

Alex Elman
4:24 PM
Sarah is currently managing the incident I can relay any messages here. We're seeing intermittent recovery and outage of the online store.
@Tinus
found an email indicating this could be an issue with our third party service provider so we're looking into that.

Bez
APP 4:25 PM

We have our best people working on this right?
4:25
I need an ETA that i can pass to other shareholders

Alex Elman
4:27 PM
@Bez
we can't provide an ETA right now because the provider won't give us an estimate but if you'd like to know you can update the ticket
@Tanya
opened
4:30
Conditions:
There is a website issue impacting primarily the EMEA region starting around 10:13am
It's an issue with our datacenter and we have a case open with the provider
Evaluating our BCP plans to look into failing out of the impacted datacenter
Actions:
A ticket has been opened with our provider
The social media team is working on comms
Needs
ETA from our datacenter provider
Look for failover plans in the BCP

Bez
APP 4:30 PM
Are we sending notifications to impacted users, and what is the messaging strategy?

Bez
APP 4:35 PM
What's the latest

Alex Elman
4:37 PM
@Bez
We're executing our BCP for failing out traffic from DC1 to DC2 because our datacenter provider is quoting at least 4 hours for recovering the issue in DC1
4:39
Can we let the bizcomms team not to announce on social media that we're failing over to a new datacenter?

Bez
APP 4:39 PM
is it safe to do so?

Alex Elman
  4:40 PM
@Bez
 it should be safe to let customers know we're aware of an issue but not to go into too much detail yet

Bez
APP 4:41 PM
As long as we get it fixed ASAP!

Alex Elman
  4:42 PM
Conditions:
There is a website issue impacting primarily the EMEA region starting around 10:13am. There are intermittent moments recovery but the datacenter is not stable.
It's an issue with our datacenter and we have a case open with the provider who quotes at least four hours for a recovery
Activated our BCP plans to fail over to DC2, we didn't want to go back.
In the event of a recovery of DC1, we'll hold it warm but won't fail back once we're in DC2.
Actions:
Bizcomms is working on an update for social media
Currently failing over from DC1 to DC2 with an ETA of 5 minutes
Needs
Validation of transactions and performance in DC2 before completing the failover
Next update in 10 minutes (edited)

Sarah
  4:45 PM
Hi folks, quick update from the IC. We are currently out of impact and can communicate this to customers. More formal comms to come

Alex Elman
  4:48 PM
Conditions:
We have recovered services in DC2

We'll hold it warm but won't fail back once we're in DC2.
There is a website issue impacting primarily the EMEA region starting around 10:13am. There are intermittent moments recovery but the datacenter is not stable.
It's an issue with our datacenter and we have a case open with the provider who quotes at least four hours for a recovery
Activated our BCP plans to fail over to DC2, we didn't want to go back.
Actions:
Bizcomms is announcing recovery on social media
Needs
Continuously monitor the recovery
Start gathering artifacts for a post-incident analysis
